Dataset Description

The dataset is a collection of 160 two-choice questions and answers about Ethiopia, specifically focusing on the topics of sports, culture, history, politics, and education. The data is provided in Amharic and is formatted for machine learning or data analysis tasks, such as training a question-answering or classification model.

Dataset Details

- **Dataset Name:** Ethiopian Knowledge Dataset
- **Total Entries:** 160 questions and answers
- **Language:** Amharic
- **Main Categories:**
  - Sports
  - Culture
  - History
  - Politics
  - Education
- **File Format:** The data is presented in a table format with clear headings.

Data Structure

Each entry in the dataset is composed of four distinct fields:

- **prompt**: The question being asked in Amharic.
- **solution0**: The first of two possible answers to the question.
- **solution1**: The second possible answer to the question.
- **label**: A binary value indicating the correct answer. A label of **0** means solution0 is correct, and a label of **1** means solution1 is correct.

Example Entry

Using an example from the dataset, the structure and function of each field are as follows:

prompt	solution0	solution1	label
የኢትዮጵያ እግር ኳስ ቡድን ምን ስም አለው?	ዋሊያዎቹ	አንበሳዎቹ	0

You can found is the translated example in to English :

- **prompt** asks: "What is the name of the Ethiopian football team?"
- **solution0** is "Walyas"
- **solution1** is "Lions"
- **label** is 0, indicating that solution0 ("Walyas") is the correct answer.
